

Street Magic® MAGIC™ Zone Remote Control

INSTALLATION GUIDE

This guide assumes user has properly installed the LED lighting products that are to be used in conjunction with this product. Please check with LED manufacturer for procedures and instructions for the proper installation of their LED products.

Make sure bike is *cool* and parked on *a flat secure surface, always wear appropriate safety equipment*

Next locate the battery and unhook *the battery negative (-) cable.*

********Safety Caution! ********

Negative (-) battery cable must be unhooked first to avoid potential fire hazard!

Group LEDs into 3 zones. Locate positive wires from all 3 zones and join all wires together into one group. Next locate all the negative wires from zone 1 and join them together into one group. Locate all the negative wires from zone 2 and join them into one group. Finally, locate all the negative wires from zone 3 and locate them into one group.

Wires for Magic™ Zone control unit are as follows:

RED WIRE: Connects to Battery positive terminal or other positive 12 volt source with key in off position.

BLACK WIRE: To Battery negative terminal or other suitable ground connection.

WHITE WIRE: Power to LEDs positive wire group.

Orange Wire: Connect to all LED Negative wires of zone 1

Blue Wire: Connect to all LED Negative wires of zone 2

Green Wire: Connect to all LED Negative wires of zone 3

Operation:

Button 1: Select Zone

Button 2: Fade Zone to Zone

Button 3: Strobes

Button 4: Off
