

### Street Magic Tombstone LED Tail Light

1. Be sure bike is turned off.
2. Remove 3 screws from stock lens and remove lens and housing.
3. Remove OEM bulb from socket.
4. Be sure socket is clean.
5. Insert 1157 base into OEM socket and twist so that base is fully seated.
6. Clean point of contact on reflector, where tape on board will make contact; with rubbing alcohol, allow to dry.
7. Remove tape liner and slide LED board down screw posts so that tape contacts reflector. Wedge into place.
8. Reinstall lens and housing assembly.
9. Tighten all three screws.
10. Test operation in all modes.
