We offer one of the best warranty programs in the industry and we back our products with excellent customer support, if you have questions before or during installation of this product please call Custom Dynamics® at 1(800) 382-1388.

Part Numbers: IND-TS-CONV

Package Contents:

-Turn Signal Polarity Converter (2)

Fits: All 2014-2022 Indian® Models

ATTENTION

Please read all Information below before Installation

Warning: Disconnect negative battery cable from battery; refer to owner's manual. Failure to do so may result in electrical shock, injury, or fire. Secure negative battery cable away from positive side of battery and all other positive voltage sources on vehicle.

Safety First: Always wear appropriate safety gear including safety glasses when performing any electrical work. It is highly recommended that safety glasses be worn throughout this installation process. Be sure vehicle is on level surface, secure and cool.

NOTE: Do not exceed a maximum current draw of 500ma per Turn Signal Polarity Converter.

Installation:

1. Disconnect the negative battery cable from the battery.
2. Connect the Turn Signal Polarity Converter to the existing turn signal circuits. You will use 1 Turn Signal Polarity Converter per turn signal circuit. Refer to the wiring diagram below for wire connections.
3. Secure the Turn Signal Polarity Converter so that it will not be damaged or directly exposed to the elements.
4. Test all lighting for proper operation.

Output Side

Output to Accessory Light,
Switched +12VDC
MAX Current Draw: 500ma

RED

Input Side
