Part Number: MAGIC-STROBES-DYN

Package Contents:

- Magic Strobes™ Brake Flasher (1)
- Instructions

Fitment: 2012-2017 Harley-Davidson® Dyna® Street Bob, Wide Glide & Low Rider S.

Must be used with Low Power Current Draw LEDs such as Custom Dynamics, The use of Incandescent or High Power LEDs (greater than 300ma) will cause the unit to fail.

Installation

1. Secure motorcycle on a level surface. Remove seat. Disconnect negative battery cable from the battery. Locate and unplug the lighting connector to the rear fender. (See photo on right for connector location)
2. Plug the Magic Strobes™ DYN module, in-line, into the rear lighting harness and into the bike's wiring harness.
3. Re-connect the battery's negative battery cable to the negative of the battery.
4. Locate a secure place for the Magic Strobes™ DYN unit that will not interfere with the secure placement of the seat or side cover. Use tie wraps or tape if needed (not included).

Initial Setup and operation

5. Locate the two switches and rotary dial. Be sure the rotary dial is set to position 0. There is small arrow on the dial, this is the pointer that should now be at position 0.
6. Make sure switch 1 & 2 are in the ON position.
7. Select the desired strobe setting listed below with the power off. Always turn power off before changing settings.
8. Turn power on and test for function of the turn signals, running and brake signals with desired setting.
9. Switch 1 enables you to turn the strobe feature on/off on the rear turn signals (if equipped), or other lights installed such as our Fillerz™ or Plasma Rods™.
10. Switch 2 enables you the ability to turn on/off the center brake (if equipped) strobe signal.

Please read all Information below before Installation

CAUTION: Must be used with Low Power Current Draw LEDs such as Custom Dynamics®. The use of Incandescent or High Power LEDs (greater than 300ma) will cause the unit to fail.

Important: Module must be secured after installation. Find safe area away from any moving parts and out of the way of normal operation of the bike. Use tie-wraps or other means to secure. Custom Dynamics® is not liable for damage as a result of improperly securing or failing to secure the module.

Important: This module will not work properly if the settings in your BCM (body control module) have been modified from its stock factory configuration.

Important: Dial and switches should be maneuvered by hand only. Do not use any tool such as a screwdriver that could damage waterproof covers.

Caution: A stuck brake switch may cause this unit to over-heat and fail. Unplug module immediately if this condition occurs.

Note: Although this device has been designed to significantly increase your braking visibility, flash/strobe patterns may not be street legal in your area. This device is not DOT approved.
