Custom Dynamics® Sequential Saddlebag LED Lights
Installation Instructions

We thank you for purchasing the Custom Dynamics® Sequential Saddlebag LED Lights. Our products utilize the latest technology and high quality components to ensure you the most reliable service. We offer one of the best warranty programs in the industry and we back our products with excellent customer support, if you have questions before or during installation of this product, please call Custom Dynamics® at 1(800) 382-1388.

Part Numbers:
- CD-SBSEQ-BCM4-BR
- CD-SBSEQ-BCM4-BS
- CD-SBSEQ-BCM4-CR
- CD-SBSEQ-BCM4-CS

Package Contents:
- Saddlebag LED Light W/ Quick Disconnect Harness (2)
- BCM Y Harness Adapter w/ Plugs (1)
- 3M™ Primer Ampule (1)
- 4" Cable Tie (10)
- Tie Wrap Holder (4)
- Posi-Tap™ (2)

ATTENTION

Warning: Disconnect negative battery cable from battery; refer to owner’s manual. Failure to do so may result in electrical shock, injury or fire. Secure negative battery cable away from positive side of battery and all other positive voltage sources on vehicle.

Safety First: Always wear appropriate safety gear including safety glasses when performing any electrical work. It is highly recommended that safety glasses be worn throughout this installation process. Be sure vehicle is on level surface, secure and cool.

Important: This product is designed and intended for use as auxiliary lighting only. It is NOT intended to replace any original lighting installed on the vehicle and should not be used for that purpose. This product must be wired so that it does not interfere with any original equipment lighting.

Bagz™ come with plug and play weatherproof quick disconnect to make future removal of saddlebags quick and easy (see pictures below).

Installation:

1. Test fit the Sequential Saddlebag Lights. The saddlebag light with the purple wire in the harness will mount on the left saddlebag. The saddlebag light with the brown wire in the harness will mount on the right saddlebag. The light should mount a couple millimeters below the bottom edge of the lid when the lid is closed. Mark the location with a grease pencil.

2. Clean area with ISO alcohol, allow to dry. Using the included 3M™ primer ampule, apply to the surface area that the LEDs will adhere to and allow to dry.

3. Remove the red adhesive backing and install the lights on the left and right saddlebags. Press firmly into place.

4. Remove both bags from the bike.

5. Select location for cable tie holders. Clean area with ISO alcohol, allow to dry. Using the 3M™ primer ampule, apply to the surface area and allow to dry. Remove paper backing for cable tie holders and press into place. (See picture below)

6. Route wires from bag to each tie wrap holder location and secure with enclosed tie wraps.

7. Remove seat from bike and locate rear main wiring harness and unplug.

8. Plug BCM Y harness adapter into main wiring harness.

Note: The BCM Y harness adapter must be after any other modules. The order of installation will be the bike’s front harness, brake strobe module (if installed), the BCM Y harness adapter and the bike’s rear harness.

9. Reinstall saddlebags. Connect 4 pin plugs from bag lights to Y adapter.

10. The single purple wire (left) and single brown wire (right) will be attached to the purple and brown wires of the harness adapter using Posi-Taps™ (included). See picture on the left.

Note: You may need to trim the heat shrink on the harness adapter to attach the Posi-Taps™

11. Secure wires with the included cable tie, make sure wiring will not come in contact with moving parts or in an area with high heat. Also take care that wires will not get pinched or frayed then reinstall seat.

12. Perform a BCM sync by turning key on. Turn 4 way hazards on. Turn key off. Allow hazards to run for 3-4 minutes. Turn key on. Turn hazards off. Turn key off.

13. Test operation of running, brake and turn signal lights.
