Package Contents:

-V-Rod LED Tail Light

Fitment: ALL 2002-2011 V-Rod Models except Muscle

ATTENTION

Please read all Information below before Installation

Warning: Disconnect negative battery cable from battery; refer to owner's manual. Failure to do so may result in electrical shock, injury, or fire. Secure negative battery cable away from positive side of battery and all other positive voltage sources on vehicle.

Safety First: Make sure the bike is parked on a level surface and bike's mechanical components are cool to the touch.

Installation:

1. Remove stock tail light by inserting a Phillips head screwdriver into the access hole at the bottom of the fender. Push up on release tab and pull taillight out of fender.
2. Unplug amp connector at tail light housing base on fender of bike.
3. Be sure tail light base is clean and free of debris, gasket will need to make a clean contact with the base.
4. Plug amp connector from new LED tail light into housing base on fender of bike, be sure connector snaps into place.
5. Snap LED tail light into place.
6. Check operation of LED tail light in both running and brake modes.
